

## Meeting Agenda 11-24-19

### Progress Report:

- achieved & missed milestones from your project plan;
  - Completed all tasks as part of POC
  - Currently working on tasks for MVP
    - Directions for entire trip
    - Time estimates for each route
    - Account concept with saving favorite trips
    - Show saved trips, and allow user to select
- any difficulties that you encountered;
  - Google Maps API calls cost money, so we had to minimize calls to the API and modify our approach to implementing our path-finding method
  - Map UI relied heavily on Google Maps API calls and there were challenges when integrating a custom Maps with the website (e.g. Google did not support multiple types of transportation for a single route out of the box)
- any changes made to your design or project plan.
  - Nothing concrete for now, but we are considering adding a new feature to send directions to email in the future, most likely after MVP
  - Considering how to display directions in a neat manner with UI. Perhaps each route will have its own section users can click to see.
  - Looking into having Blue Bike docks be marked on map as users log in.

### Points to discuss:

- Progress report
- Feedback from POC presentation
- Goals and tasks necessary for MVP
  - Go over project plan
  - What changes should we make (if any?)
- Design
  - Go over current design
  - Go over feedback received, which ones we want
  - What changes should we make to design (if any?)
